

THIEAUDIO

THIEAUDIO Monarch

★★★★★ 45 reviews | 3 questions

\$729.00 USD

Electrostatic Tribrid In-Ear Monitor with 1 Dynamic Driver + 6 Balanced Armature Drivers + 2 Electrostatic Drivers

- Authentic American Knowles and Danish Sonion Drivers
- 4-Way Passive Crossover Circuitry
- 4 Sound Bores
- Natural Tonality and Powerful Subbass.
- Litz 5N OCC 100 wire x 4 core Silver Plated Cable

Cable Jack Option - 2.5mm *

2.5mm 3.5mm 4.4mm

IEM Type - UIEM *

The Journey of THIEAUDIO High-end IEMs

The goal of Thieaudio was to serve as a creative platform for gathering the best teams of engineers to inspire revolutionary audio products for audiophiles and professionals alike. For each project, we hand select the most innovative and renown engineers in his or her field to oversee the design, engineering, and manufacturing of the products. We are proud to present two top-of-the-line signature series In-Ear Monitors - the Monarch and the Clairvoyance

Signature Series: Monarch & Clairvoyance.

Gathering the momentum from the success of the Thieaudio Phantom planar magnetic headphones, and the Voyager and Legacy series In-Ear Monitors (IEM's), the two new monitors utilize the latest driver technology from the Danish manufacturer, Sonion - the Electrostatic (EST) tweeter. The EST driver features an ultralight membrane in a small tweeter chamber that is powered by an independent transformer to extend the in-ear monitor's treble range up to 80kHz

Monarch - King of the IEM's

From the tuning to the technical capabilities, the Monarch was designed to bring out the best that In-Ear Monitors can offer. The sound signature had to be analytical to bring about precision and a reference-style tuning. This necessitated a linear midrange section which would place all instruments balanced with one another and provide an overall clean and lean sound. The mid-treble transition peaks at the inner ear canal resonance point and is sustained through the entire upper frequency range to maximize detail retrieval and overtone presence. Yet, careful attention was placed in making the trebles smooth and void of sharp peaks or dips to eliminate any uncomfortable upper harmonic irregularities. We find the Monarch to be among the few IEM's on the market to truly and cohesively integrate the balanced armature and EST drivers in a manner that shines forth the best of their potentials. The Monarch stands as Thieaudio's best display of technological and sonic innovation and is ready to redefine the musical standard for In-Ear Monitors. On the other end of the spectrum, a 10mm dynamic driver and multi-balanced armature woofers have been implemented to bring about a punchy subbass impact. The lowpass point was selected below 150Hz to create an even cleaner midrange section, while still allowing a powerful subbass to lay down the foundation.

Description.

Thieaudio was launched in 2019 as a creative endeavor of Linsoul to expand on the limits of high-fidelity audio. We welcome you to experience the musical performance! In reality, the utilization of this driver provides an extreme-treble response and thereby provides a protruded enhanced sound resolution. The correct implementation of balanced armature driver earphones seem dull and lackluster in comparison to the developed biopolymer dynamic driver and traditional armature drivers. The Monarch focuses on a precise treble response with an exceptional candidate for a CIEM (Custom In-Ear Monitor). The Clairvoyance emphasizes a natural tonality with a re-envisioning of the popular Harman curve, the Clairvoyance subbass and extended high frequencies. Both models are uncompromising tonality and technicality are needed, and we are proud of Thieaudio's engineering.

SHOP WITH CONFIDENCE

Authentic Products

Linsoul Audio is the authorized distributor. All products are authentic and genuine.

Worldwide Free Shipping

We are located in china but send our products worldwide for free.

1 Year Warranty

We provide 1 year warranty for the all products except the cables*.

Online Support

We reply to all support inquiries within 3 working days.

The price for this IEM is advertised as \$1399 on sale for \$1259.10 in other parts of the site.
