

## Stadium “On/Stby” Button Operation

### Notes:

1. Default (AC connected) is **On**. On/Standby LED is green.
2. From **On** mode, press "On/Stby" button to enter **Sleep** mode.
3. From **Sleep** mode, press "On/Stby" button to enter **On** mode.
4. From **Sleep** mode, start WiFi stream to enter **On** mode.
5. From **On** or **Sleep** mode, press "On/Stby" button for 3 seconds to enter **Standby** mode.
6. From **Standby** mode, press "On/Stby" button to enter **On** mode.
7. From **On** mode, if no music plays for 60 minutes, enter **Sleep** mode.
8. When exiting Sleep or Standby mode, remember last used input.
9. In **On** mode, Power LED = Green, Wireless LED is on, WiFi radio is on.
10. In **Sleep** mode, Power LED = Red, Wireless LED is on, WiFi radio is on, Amplifier is in standby (no hiss).  
→ If Bluetooth was the last used Wireless input, then Bluetooth radio is on.
11. In **Standby** mode, Power LED = off, Wireless LED is off, WiFi radio is off, Amplifier is off, main power supply is off.

## Stadium “Wireless” Button Operation and Wireless Setup

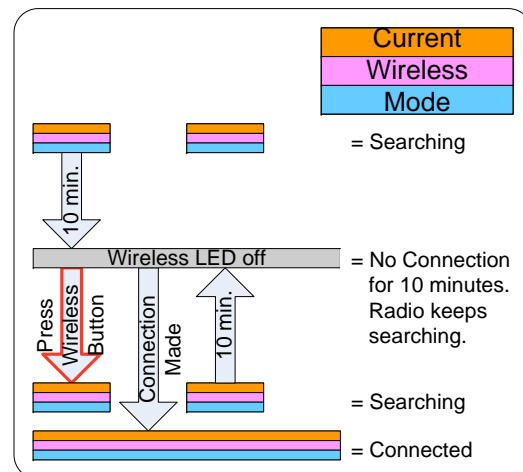

**Notes:**

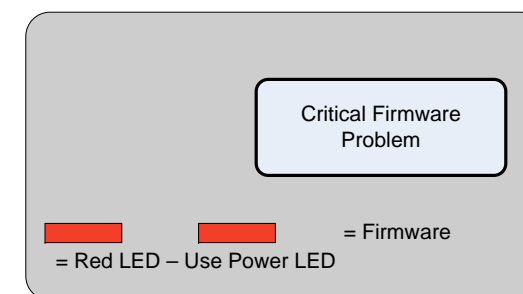

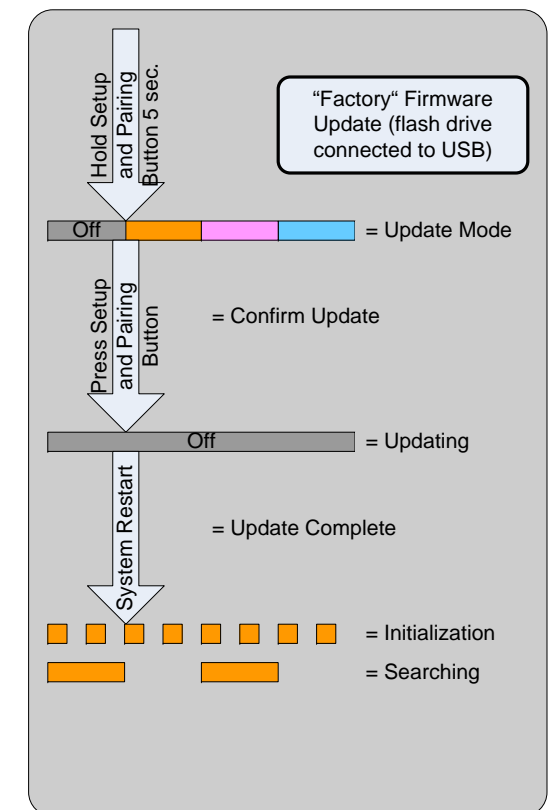

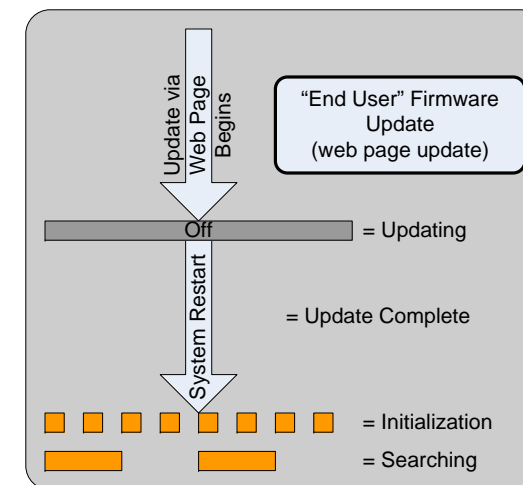

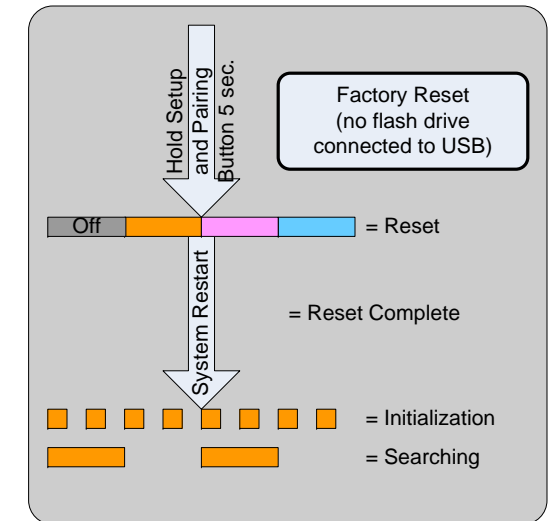

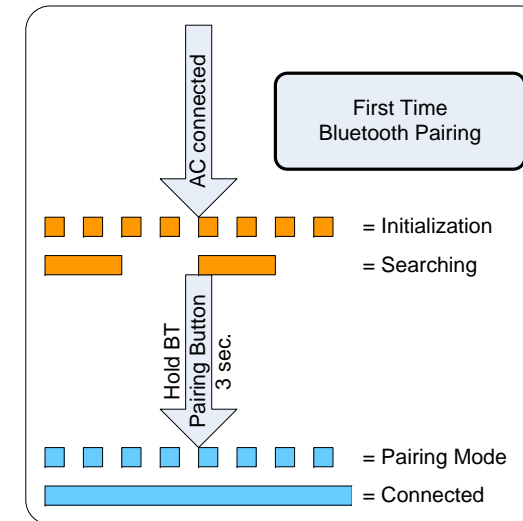

Default (AC connected) is **Wi-Fi Network** mode. Hold “Wireless” button 3 seconds to enter **Wi-Fi Direct** mode. Hold “Wireless” button 3 seconds to return to **Wi-Fi Network** mode. Press “Wireless” button (<3 sec.) to enter **Bluetooth** mode. Press “Wireless” button (<3 sec.) to return to last used **Wi-Fi** mode (**Network** or **Direct**). When exiting sleep or standby mode, remember last used input. If another source is being used and a Wi-Fi/AirPlay stream begins, automatically switch to **Wi-Fi** input, per Apple Spec.

LED flashes rapidly (4Hz) during **BridgeCo initialization** and during **Bluetooth pairing**.  
LED flashes slowly (1Hz) when searching/waiting for Network Wi-Fi, Direct Wi-Fi, or Bluetooth connection.  
LED is on (no flashing) when connection is made to Network Wi-Fi, Direct Wi-Fi, or a Bluetooth device is connected.  
If no connection is made for 10 minutes, Wireless LED turns OFF.

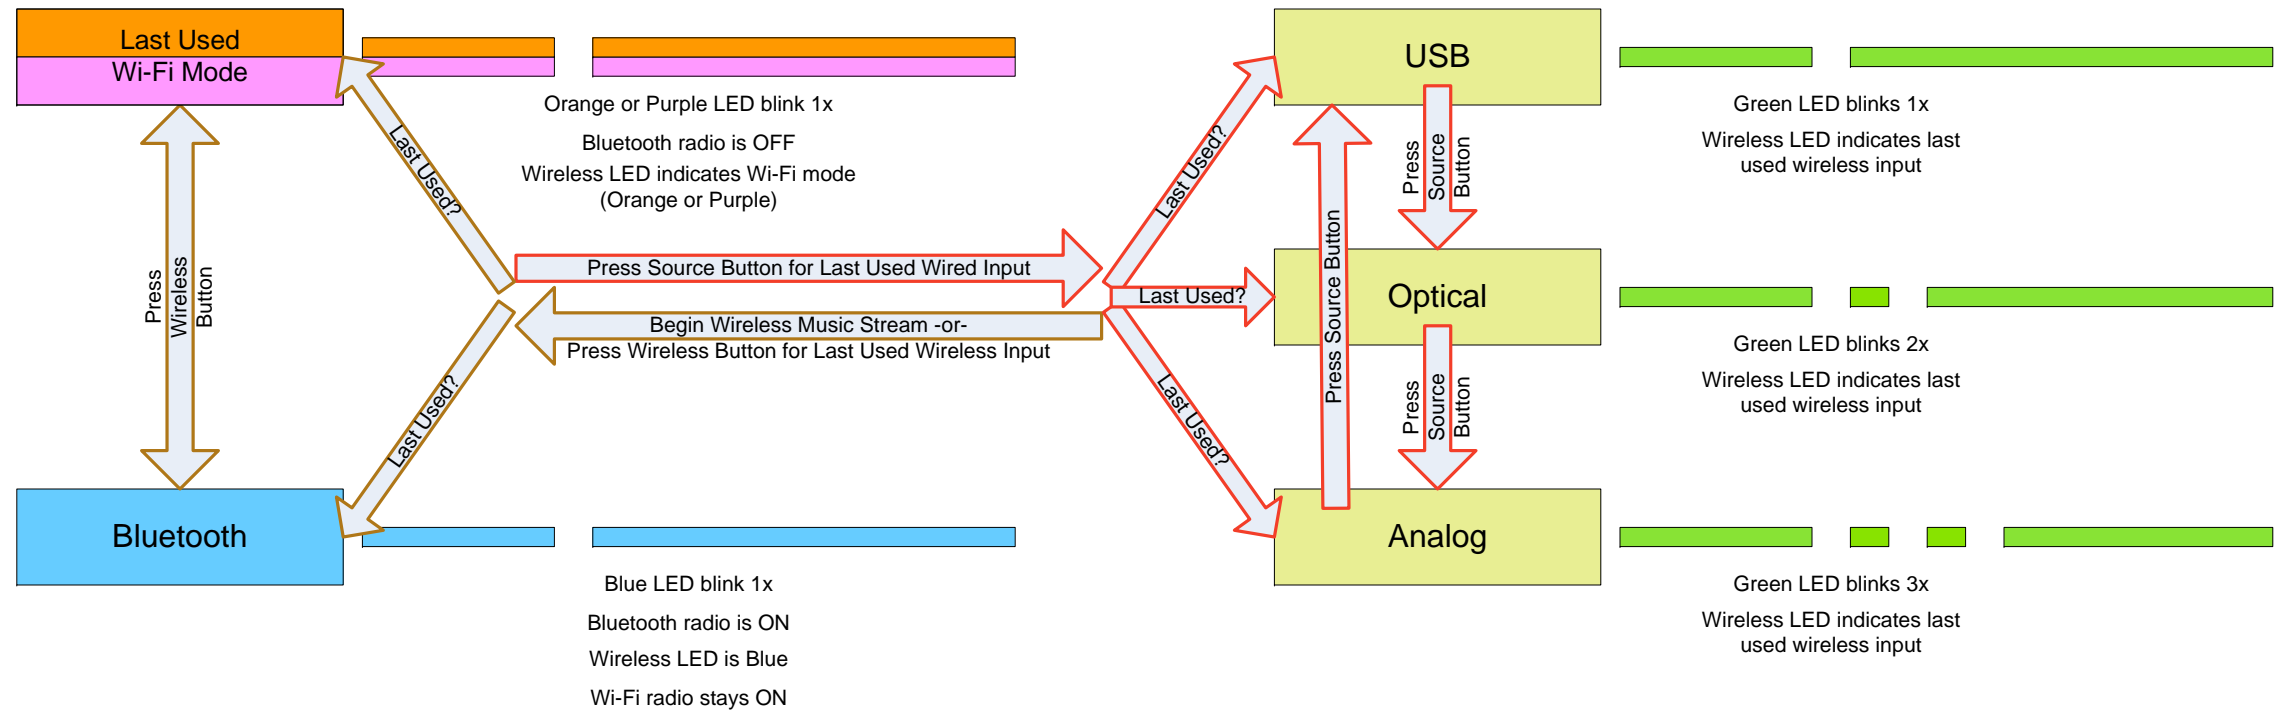

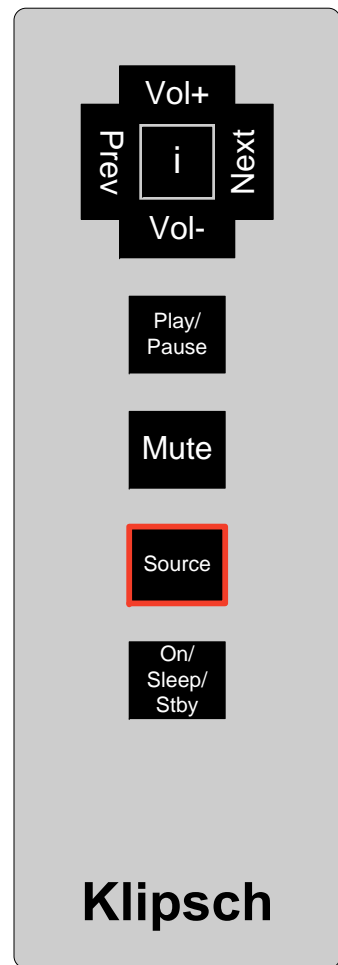

LED is ORANGE for **Wi-Fi Network** mode. Bluetooth radio is OFF.  
LED is PURPLE (ORANGE & BLUE) for **Wi-Fi Direct** mode. Bluetooth radio is OFF.  
LED is BLUE for **Bluetooth** mode. Wi-Fi radio remains on, per Apple Spec.

## Stadium Factory Reset and Firmware Operations

## Stadium “Source” Button Operation

**Notes:** System remembers last used Wired Source and last used Wireless Source. System will wake from **Sleep** and **Standby** modes to last used input. System will wake from **Sleep** on Wi-Fi/AirPlay stream or Bluetooth stream (only if Bluetooth was the last used wireless input).

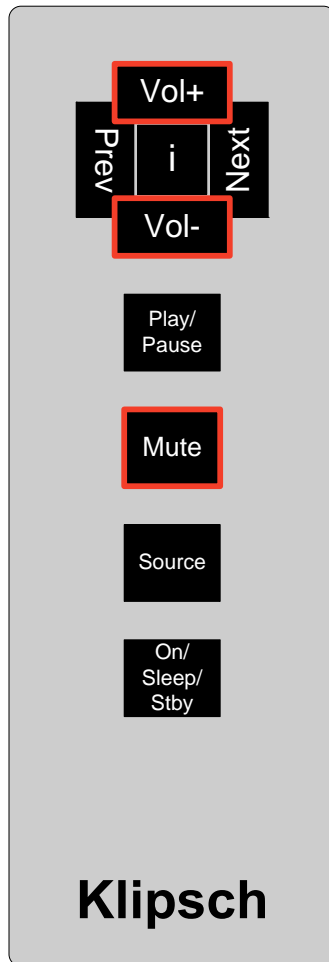

Default (AC Connected) is the **Wi-Fi** input. Press “Source” button to enter **USB** mode. Press “Source” button to enter **Optical** mode. Press “Source” button to enter **Analog** mode. Press “Source” button to return to **USB** mode.

From any Wireless Input, press “Source” button to go to last used Wired Input. From any Wired Input, press “Wireless” button to go to last used Wireless Input (or start wireless stream).

Green LED blinks 1 time for **USB** mode.  
Green LED blinks 2 times for **Optical** mode.  
Green LED blinks 3 times for **Analog** mode.

Wireless LED blinks 1 time for when “Wireless” button is pressed.  
Wireless LED shows current/last used wireless connection color.
